CORN BORER MOST SERIOUS PEST

Corn borer is one of the most serious crop pests in United States.

In some of the heaviest infested areas every corn stalk had borers in 1926.

90 per cent corn acreage reduction in two counties in Ontario since 1920.

Crop over 400 square miles complete failure.

Stalks and tassels break and ears are damaged.

If not checked, the borer will ruin your corn field.
